Scientific output as blogposts

[Why use Pure](#)[How to use Pure](#)[News & Articles](#)[About this website](#)**Make your publications visible**

The Etalage project aims for optimal registration, presentation and disclosure of your research information by introducing Pure. This website informs you about the use of Pure.

In early 2013, the Board of the University of Groningen initiated the Etalage project. The project's principal aim is to optimize the visibility and accessibility of research output of the University and the UMCG as well as making it easier to generate analyses and reports based on these research results. As a result, the University has decided to implement Pure, a Current Research Information System (CRIS), as the single source of information about our research. This replaces the different systems that are currently in use.

[Read more about Etalage](#)

Stay informed through our special newsletter

A new CRIS | PURE | Atira (now Elsevier)

SCIENCE 2.0 WORKSHOP IN
THE LIBRARY permanent beta

WHAT NEXT

- Take the Workshop outside the library, on Tour...
- Maybe online module

LESSONS LEARNED

- It's hard work creating awareness, but somebody's gotta do it!
- Exchange & interaction
- Improve the workflow a priority
- Tailor-made a must
- Impacts perception of library
- Positive impact on library staff

If you want to be seen as an expert ...
...then your expertise has to be seen
