As the authors have already pointed out, the majority of Czechs do not identify themselves with traditional religious forms of transcendence. At the same time, however, the already relatively open church-oriented fifth of Czechs with God-given healing powers (Table 3). A belief in horoscopes is only a little less popular.

Table 2. Church religionists, atheists and the 'category in between' in Czech society.

<table>
<thead>
<tr>
<th>Year</th>

</table>

**Main Problems in Information Search**
- Topical and conceptual ambiguities
- Missing links between publications and research data

**Approach**
- Named Entity Recognition (names, places, organizations), keyword detection
- Recognition of variable mentions

**Benefits**
- Facilitate the search for both text and data
- Enrich data with context information from text and vice versa
- Better search results with resolved ambiguities
